Greetings,  
The framers and implementers of the Constitution in their providing American citizens with the Freedom Of Speech left no room in the First Ammendment for private groups who may have special business, finiancial or political interests to disenfranchise the freedoms therein contained.

To this end I address the current movement of the National Association of Broadcasters who are attempting to stifel and end XM Satellite radio broadcasts. Please do not allow this travesty to take place.

XM radio has brought to me and my wife endless hours of commercial free broadcast of weather, news, music and talk radio that we enjoy that is not available on either FM or AM radio. We enjoy these broadcasts in our home and in our automobile as we travel and do not lose local stations. XM radio is always our local station regardless of where we choose to be. We particularly enjoy this freedom. We pay seperately for this enjoyment and want it to continue.

God Bless America and let her remain free!

Thank You
